

```

char s[100];
int i, cnt=0, inword=0;

gets(s);

for (i=0; i<_____ ; i++){
    if (isalpha(_____))

```

```

(s[i] ) &&
(s[i] )

```

```

s = "abc xyz pqr";
inword = 11101110111

```

Word Count

```

        inword=___;
    else{
        inword=___;
    }
}

```

	現時 current	
inword	0()	1(A)
之前 previous	0()	1(A)
	1(A)	

word count

<http://www.ablmc.edu.hk/~scy/home/javascript/word-count.htm>

開啓文字檔 ET.txt / MIB.txt
 數行數(lines)及字數(words)

```

例如：
L1. Introduction
    1 word(s)
L2. In front of them now was a small alien.
    9 word(s)
...
L20. These are also Penguin Readers.
    5 word(s)

Total: 20 lines, 198 words

```
